

FileCenter Success Story - Accounting

LARRY COX HAD A PROBLEM: For Larry, like most small office accountants, time means money — and time spent chasing after paper documents is money out the window. This became obvious last tax season. “We are a small office, just myself and two employees. Last year it seemed like half my time was spent sorting, searching and sifting through paper instead of preparing returns.” That is when Larry decided to go paperless.

FILECENTER WAS READY FOR LARRY when Larry was ready to leave paper confusion behind. “I looked at a lot of different products, but most seemed to require IT staff or special hardware that only large firms could afford. I needed a paperless office solution specifically designed for a firm of my size.” FileCenter combines the most useful features of bigger, more expensive document management software, and adapts them for small to medium firms. There is no need for specialized hardware, IT support, or the high cost of other document management systems. FileCenter had everything Larry needed to make the shift to a paperless office.

GEARED UP WITH FILECENTER, Larry’s tax season ran like clockwork. Instead of filing like he used to, Larry simply scanned all of his clients’ supporting documents into FileCenter’s easy-to-use electronic filing cabinet. “The program even lets me put a separator in when scanning, which saves the document directly in the client file.” Not only is the document saved, but FileCenter’s text recognition software allows the scanned document to be full text searchable. “No longer am I shuffling through files. Everything I need is in front of me in a matter of seconds.”

LARRY COX HAD A PROBLEM. FILECENTER HAD THE SOLUTION. “Other years I felt like I was on one long business trip from the beginning of February until April 15. With FileCenter, I am able to prepare more returns AND spend more time with my family. The difference is incredible! Going paperless with FileCenter is the best business decision that I have ever made!”

The FileCenter logo, with "FileCenter" in a large, bold, orange sans-serif font, and "File Management & Paperless Office" in a smaller, grey sans-serif font below it.
